AMES GENEALOGY

BOSTON PUBLIC LIBRARY

This record of vital statistics up-dates Winthrop Ames's genealogy which appears in *The Ames Family of Easton, Massachusetts,* pages 200-226, privately printed in 1938, the year after his death and now out of print. The large increase in the family since that year seems to call for the complete index of surnames and maiden names which is presented here. Residences shown are the latest principal residences, and purposely state only the city, town, or village — without street address. The places of birth, marriage, and death are omitted, as well as occupations and other details which generally are not considered to be vital statistics.

The ingenious numbering system originated by Winthrop Ames is carried on, so that each person has just one number, a permanent one, as with Federal Social Security numbers. The number shows at a glance not only the generation, but also the order of birth in each family and sub-family. Regretfully, a new family tree to supplement Winthrop's fine one attached to his book, could not be included because of its impossible size. Maybe some artistic cousins would enjoy seeing what they could do about some new trees, done in several separate sections.

Only a tiny fraction of the entire family have failed to be brought up to date here. That there were not many more blanks is due to the patient cooperation of the dozens of senior members who answered the questionnaires. In cases where vacant spots still remained, other close relatives were urged to fill in what they could. The 12th annual edition of *ARCH* was a great aid in listing the currently living descendants of Frank Morton Ames and his wife Catherine Copeland (see No. 23 through No. 29C-3). Keep *ARCH* coming, good Cousins of Dover!

Since 1937 the population gain among the descendants of Oliver Ames Sr. (the first Ames to settle in North Easton) raises the tally from say 167 living persons* in Winthrop's book to about 440 living persons* in this pamphlet — an increase of 163 *per cent.* During the same 33 years the nation's population grew from about 129 to 205

* Including spouses who married into the Ames family, but excluding divorcees who left the Ames family.

millions, or 59 *per cent*. Such a large difference in growth rates seems to invite some meditation. It might be a subject for some one in the family who will be straining his or her brain for some honors from Harvard — far and away the first choice of such of the Ames descendants as went to college at all.

One side of each sheet is left blank to provide space for future arrivals, weddings, and departures. How constructive it would be if each family kept itself up-to-date by jotting down there such events *as they occur*, so that in another generation a new edition could be prepared more easily than this one was, for the benefit of the rest of the family, present and future.

Please write me whenever you have a new vital statistic about your own family group, or whenever you find one of the inevitable errors. You even might tell me how to fill in some of the regretted omissions.

It has been fun getting to know a bit about so many cousins, scattered so far and wide, even if most of them appear before me only in writing. I hope you also will learn something new about this interesting family of nearly 700 persons.
